There is a full range of support materials for the Dark Den, from lighting to textured and sensory play materials. Log on at www.tts-shopping.co.uk for inspiration and ideas to get the most from your Dark Den activities.

1. Sort the different parts ready for assembly.

2. Slide the pole into each of the sleeves on the top of the den.

3. Connect the poles with corner connectors.

4. Turn the den over.

5. Slide a pole into each of the sleeves on the bottom of the den.

6. Connect the poles with corner connectors.

7. Slide the remaining 4 poles into the sleeves at each corner and attach to the bottom.

8. Attach the side poles to the top corner connectors

9. The completed den will look as above.

Product Code

EY00254

See assembly notes (PTO)

This resource is very adaptable. It can be used as a sensory area, a den, a cosy corner etc. It can be decorated to transform it into a rainbow cave using ribbons, or an ice castle with foil icicles etc. Items can be tied to the corner poles.

When using light effect equipment children can explore patterns, colours, shadows etc. It makes a great science exploration area as the light can be “cut out” ie absence of light experiments.

The door and windows can be open or closed. Simply role the fabric and tie.

We hope you enjoy using this resource.
