

# Wonder of Light

## So why not link this theme of light to science learning?

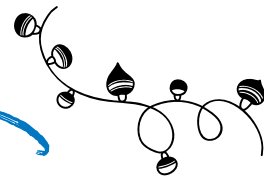

Cut out the below Rudolph template, create a unique design for him and then cut a hole out for his nose! Using a range of components, children must use their learning about electricity to create circuits with bulbs that will make **Rudolph's nose shine**.

Challenge children to think of ways to make the bulbs shine brighter and then draw the circuits with the correct symbols.

# Wonder of Light

## So why not link this theme of light to science learning?

Cut out the below Menorah template, create a unique design for it and then cut holes for the candles! Using a range of components, children must use their learning about electricity to create circuits with bulbs that will make **the candles glow**.

*Cut all these holes out*

Challenge children to think of ways to make the bulbs shine brighter and then draw the circuits with the correct symbols.
