

## Economy Bowl Bench

### **Product Code: EY10886**

This wooden bench is a lovely addition to your outdoor area. This unit has removable bowls. It is a versatile, open-ended unit for children to explore and experiment with. The bowls enable the bench to be used in a rich variety of ways. The bowls can be filled with all kinds of ingredients and materials.

- The bowls could be used as part of a science centre.
- Place things in that need sorting i.e. clarify materials by shape, colour, size etc. It could be leaves, stones, pebbles, jewels, and buttons. Children really like to sort and match.
- Have one bowl with water and the other two with dry materials such as sand and flour. Let the children pour the liquid into the other bowls and discover what happens. Can they change it back? Is it wet or dry? Can they make a reversible change?
- Use as part of a pretend home corner where meals are being prepared.
- The bowls could have different construction materials inside.
- Children will enjoy creating messy mixtures with this bench. Provide lots of tools such as; spoons, jugs, mashers etc. for children to use their motor skills.
- You can use this bench as a water station. Make sure you have lots of jugs, tubes, channels etc. for children to explore water play. You can use the Channel and Cascade Unit (EY10563) alongside to further their water play discoveries.
- Children can have their own potting bench. Work together to plant seeds and to take care of the plants you grow. Children can develop their Understanding of the World by learning how to take care of living things. There are lots of gardening tools that children can use trowels, spades, watering cans etc. Children can use Recordable Magnifying Glasses to see if there are any living creatures on their plants.
