

T-Rex Handling and Care Instructions

How to assemble your *Wild & Wonderful* T-Rex in just **FIVE** easy steps!

1. Glue each joining edge (this will help the joints slide together)

2. Ease glued joints together (some firm but careful manipulation may be required—see *care notes*)

3. Then, cut short strips of brown paper (included in the pack) and apply with glue, sticking around the joints

4. Repeat the last step until you have completely sealed all of the joints

5. Once all joints are completed, leave to dry for up to 2 to 3 hours—until the shape is firm

Care notes:

This product should be assembled by 2 adults and the joints need to be left to dry well before your creative activity is due to take place.

These items are handmade and each dinosaur is individually finished and there may be slight variations in shape.

Some peripheral damage may occur to the joining edge when assembling. This will not affect the overall finish of the dinosaur and will be covered when step 3 is completed. Tight joints are required for the stability of the product.
