

Gold and Blue Mirror Active World Insert

Product Code – EY06071/EY06072

These inserts can be used in a variety of ways. Children may choose to place certain items within them. They can become a small world location. The practitioner may place specific resources inside the tray to provoke learning. We used golden and blue coloured collections.

Try using different textures and sizes. The mirror effect is good for adding extra appeal, so you may wish to use it for housing treasure or shiny resources. The blue insert makes a good base for an under the sea theme.
