

Wonderful Water Tunnel – EY05234

Children will enjoy devising their own ways to play with this super tunnel. Here are a few suggestions:

- Have an assortment of water containers to collect the cascading water from the sides.
- Children will enjoy using brushes on the tunnel sides. Using paint means that patterns will be created.
- Paint inside the tunnels to make it appear to be under the sea. It will look like a giant aquarium.
- Place colouring inside the water trough so that the coloured water emerges down the side of the tunnel. (Make sure it will not stain clothes).
- We found that the children really enjoyed using pots and pans with the tunnel. They created lots of concoctions.
- Have containers that the children can press, squirt etc. Old washing up bottles work well.
- Old soap dispensers with different coloured water can be incorporated into the play (The ones that have a pump to press).
- Attach Squidgy Sparkles or cut out pieces of cellophane, to create a stained glass window effect.
