

Woven Pods

Product Code: EY06778

These pods can be used indoors and out as they are made from plastic. They give a natural effect but the durability of plastic.

There are various suggestions for using them.

- Some children will use them a little like bags and transport items around in them.
- The children may like to find things and place them inside the pod or even cover it up. This may depend on their schematic behaviours.
- The pods make great little houses for elves and fairies and can be used inside or out. We placed some in a woodland environment, amidst lots of natural materials and a few wooden fairies. The children enjoyed discovering the houses. They could then go on to make the houses more homely, adding accessories such as chairs, table, fences, pots and pans, etc.
- If there is not access to a natural area try to provide a box or a trolley where children can select pieces of wood, moss, pebbles, etc.
- Place the pods in active world trays for more small world scenarios. Try placing them in a large plant pot, amidst flowers. Paint steps on the pot to show how the fairies gain access to the door.
- The pods also make great animal shelters. They could be part of a farm scene.
- Try using them to carry your puppy home from the vet role play area.
- Use as a superhero location or a fairytale dwelling.
