

## Mirror Blocks

**Product Code: EY03243**

These blocks are really appealing as they have mirrored surfaces. Curious babies like to look, stare and gaze, so these blocks will really engage them.

The children can peer into them and see their reflections.

- Use them in construction areas differing the blocks to add extra interest, as well as difficulty. Vary the contents in size, shape, finish and weight.
- Children will love making their own creations with these blocks. Perhaps it will be a castle or a shop.
- Young children may simply enjoy stacking and knocking the blocks over. It could also be that they like lining them up depending on their schematic behaviour interest.
