

Number Trios

Addition and subtraction are linked.
Three numbers can be 'related' to
show four different facts.

1	$2 + 3 = 6$ $3 + 2 = 6$ $6 - 2 = 3$ $6 - 3 = 2$	6	$\square + \square = \square$ $\square + \square = \square$ $\square - \square = \square$ $\square - \square = \square$	11	$\square + \square = \square$ $\square + \square = \square$ $\square - \square = \square$ $\square - \square = \square$
2	$\square + \square = \square$ $\square + \square = \square$ $\square - \square = \square$ $\square - \square = \square$	7	$\square + \square = \square$ $\square + \square = \square$ $\square - \square = \square$ $\square - \square = \square$	12	$\square + \square = \square$ $\square + \square = \square$ $\square - \square = \square$ $\square - \square = \square$
3	$\square + \square = \square$ $\square + \square = \square$ $\square - \square = \square$ $\square - \square = \square$	8	$\square + \square = \square$ $\square + \square = \square$ $\square - \square = \square$ $\square - \square = \square$	13	$\square + \square = \square$ $\square + \square = \square$ $\square - \square = \square$ $\square - \square = \square$
4	$\square + \square = \square$ $\square + \square = \square$ $\square - \square = \square$ $\square - \square = \square$	9	$\square + \square = \square$ $\square + \square = \square$ $\square - \square = \square$ $\square - \square = \square$	14	$\square + \square = \square$ $\square + \square = \square$ $\square - \square = \square$ $\square - \square = \square$
5	$\square + \square = \square$ $\square + \square = \square$ $\square - \square = \square$ $\square - \square = \square$	10	$\square + \square = \square$ $\square + \square = \square$ $\square - \square = \square$ $\square - \square = \square$	15	$\square + \square = \square$ $\square + \square = \square$ $\square - \square = \square$ $\square - \square = \square$
