General Product Description

Writing instruments are essential tools for communication, creativity, and organization. They are used in a wide range of environments, from schools and offices to homes and studios, and serve both functional and expressive purposes.

These products are considered general-use items and are designed for everyday writing, highlighting, marking, and drawing. Depending on the type, they include:

- Fineliners and fibre-tip pens for precise writing and structuring
- Ballpoint pens and rollerballs for smooth, continuous writing
- Highlighters for emphasizing text
- Markers for labeling and creative applications
- Fountain pens and pencils for traditional or artistic use
- Colored Pencils for coloring and drawing

Most ink based writing instruments consist of a plastic housing, an ink reservoir and a writing tip (e.g., chisel, bullet, or fiber tip). The ink is water-based or alcohol-based depending on the intended use and product type.

Wood based writing instruments consist of a wooden shaft which houses a lead. The diameter of the pen and/or the lead is different for the products. Most leads consist of pigments, binders, fillers and lubricants.

Intended Use and Safety Information

Writing instruments are intended for manual application of dye or pigments to paper and similar surfaces. They are suitable for users of various age groups and are not intended for ingestion, application to skin, or use on food-contact materials.

When used as intended, they pose no significant health or environmental risks. If misused, the contents may cause intense staining of skin, mucous membranes, and textiles. Stains on textiles may be permanent.

In case of eye contact, rinse with running water for several minutes and consult a doctor if necessary.

When stored and used as intended, the product does not pose any hazardous reactions.

In case of fire, carbon monoxide (CO), carbon dioxide (CO₂), and nitrogen oxides (NO_x) may be released.

REACH and SVHC Compliance

These products are articles according to Regulation (EC) No. 1907/2006 (REACH), Article 3, therefore a safety data sheet is not required under Article 31 REACH.

STABILO products do not contain SVHCs above the 0.1% threshold.

However, products listed in Appendix A may contain SVHCs as defined by the current candidate list published by the European Chemicals Agency (ECHA). If this is the case, customers are informed separately and transparently about the presence of SVHCs, including the substance name, CAS number and concentration range, as required by Article 33 REACH. The list of affected products is available on request.

Transport Information

These products are not classified as hazardous material under transport regulations.

Ecology and Disposal

If recycling is not possible, small quantities may be disposed of with household waste. Larger quantities must be disposed of in accordance with local regulations.

Conformity with other Regulations or Standards

- REACH (Regulation (EC) No 1907/2006)
- CLP (Regulation (EC) No 1272/2008)
- General Product Safety Regulation (Regulation (EU) 2023/988)
- EU Packaging Regulation (Directive 94/62/EC)
- Biocidal Products Regulation (Regulation (EU) No 528/2012) (where applicable)
- Toy Safety Directive (Directive 2009/48/EC) (where applicable)
- ISO 11540 (BS 7272) (where applicable)
- ISO 9001 (Quality Management)
- ISO 14001 (Environmental Management)
