

## Rustic Numbers 1-20

**Product Code: EY10646**

These Rustic Numbers are a beautiful resource for extending and developing number recognition.

- With these rustic numbers you could set out a table with naturally found resources on such as; conkers, acorns, pine cones or team it up with the Natural Sorting Tray (EY03482). With these resources children can begin to sort, count and select numerals to represent amounts. This can build up children's ability to recognise numbers and that numbers represent an amount.
- Imagine putting these into a sand tray, you could find metal coins for children to dig and discover. Once they have found an amount of coins they can find the matching number for the quantity.
- These rustic numbers can also be used in the construction area. Children can use these numbers when creating their buildings and landscapes. They may use these as house numbers.
- You could take these to your outdoor space and use these as a number hunt. Hide them in different locations and join the children in a number hunt. You can guide the children to focus on trying to find the numbers in order but to remember where other numbers they have seen.
- Hang them on fences and walls. Place them into a number line. Hang them from branches. Ensure that you risk assess when using strings or rope.
