

Magical Ingredients Storage Jars

Product Code: EY07411

As well as being practical and robust these jars are also very attractive. They have the look of faceted glass without the safety issues. Made from a robust plastic they can be used indoors and out.

- Use them on your mud kitchen to store ingredients. The children might collect leaves, stones, twigs, etc. They can be part of your outdoor laboratory and hold different utensils.
- The children might like to use them as outdoor collector jars and use them to hold their finds.
- Use them inside the classroom for all kinds of materials from beads, collage, ribbons, etc.
- They make lovely mini scenes. We made a show scene inside one with Arctic creatures, pretend snow, ice, etc. You could make an enchanted woodland grove with moss, bark, a magical tiny door and a few fairies or elves. It could also be a mini dinosaur land. If you cut fish shapes out of plastic you could attach them to the lid and have a mini under the sea. Put sand, shells, plants, etc. at the base and add water for an aquarium like space. The children can choose their own miniature world that appeals to them.
- We know these jars also make great dream catchers for those children who have enjoyed the BFG story. They could make a happy scene within them.
- Storage does not have to be dull as these jars show that. Use them in the home corner for more realism. Perhaps they could hold ingredients.
- Use them in other role play themes such as a café, a bakery, etc.
