

ITRAIL – Bee- Bot Trailer

Product Description

Why not send Bee-Bot shopping with this attractive trailer which simply hooks onto the back of your robot.

Contents

1 x Bee-Bot Trailer

Notes

This easy to use trailer is great for incorporating role play. Why not have the children decorate the Bee-Bot as a postman and then program him to deliver and pick up letters and parcels from different locations?

Incorporate retrieval exercises into your lessons. Layout a number of objects in a line approximately a length of the Bee-Bot apart. Now challenge the children to send the Bee-Bot up the line to collect the different objects.

To make it more difficult, why not have the children start without the trailer and then they can program the Bee-Bot to collect and attach it first.

NB. Due to the Bee-Bots turning circle, the trailer limits the Bee-Bot to 90' turns at a time. So in order for it to be able to complete a U-turn, the Bee-Bot must take movement forward after every turn. Why not make this a discussion point with the children? Subject to this the Bee-Bot is still able to tow objects with ease.
