

Giant Illumi Board

Product Code: EY10425

- This glowing surface offers a range of learning opportunities. It can be used on a table or on the floor. The colour effect can change at the press of a button. Literally light up learning.
- Use as a large surface to make marks. Children can make a variety of patterns. It can be big, sweeping movements or tiny shapes. Use for drawing on, writing, maths work, designs etc.
- Place pieces of paper on the board. We made snowflakes from tissue paper, acetate and shiny paper to create a wintery scene. We then looked at which material let the light shine through. You could try this with different materials. Use this as an opportunity to describe things that are transparent, shiny, dull, opaque etc.
- Make different small world scenes on the board. Use characters and landscape items.
NB: Be careful that the items are not abrasive and will not damage the surface.
- Use as an illuminated maths area. Place counters on the surface and add and take away. Write on the board with the chalk pens. Make sequences. Collate counters and sort and classify.
- Make the surface into a giant aquarium. Place tissue, seaweed, acetate fish, small world divers, acrylic stones etc. to create an underwater world.
- This is a great way of learning about letter formation. Start with large circular movements and then refine it to small, controlled formations.
- Make a magical landscape, complete with a castle. Add interesting characters. You might draw a moat or drawbridge, a swamp etc. Use this as a catalyst to tell stories and enrich language.
- Use the illuminated surface with a variety of resources available from TTS. There are jigsaws, trees, shapes, number and letter domes etc.
- Make sets of different items on the board. You could have transparent acrylic bowls and then collect counters together according to a specific criteria.
