

Wooden Framed Circle Mirror

Product Code: EY06717

A lovely mirror that can be wall mounted horizontally or vertically. Place at varying heights depending on the age/height of your children. We placed a cosy rug underneath the mirror so it was cushioned for the younger children to kneel on and peer into to see their own reflection.

- Children love seeing their reflections so this could be placed in the home corner, the role play area, the sensory zone, etc.
- Choose objects to place on the ledges (risk assessing choking hazards, etc.) We used various characters and the children could see the doll's reflections. You could incorporate small world characters, animals, etc.
