

Activity Screens

Product Code: EY06781

This set of three screens can be used in different ways.

- Use them individually or together to section off an area.
- The screens can be decorated with photographs, images or artwork.
- You could put tissue paper or foil behind the cut out patterns to create a mosaic or stained glass effect.
- Try making a themed effect, eg. the farmyard, dinosaurs, shiny materials, space, etc.
- Try textured fabrics, pieces of wallpaper or animal print papers. Attach the materials with tape or Blu-Tack to decorate the screens, customising them to meet the child's interests.
- In the baby area why not make the theme black, white and red. Choose bold patterns and clear smiling faces, zigzags, stripes, etc.
- Try placing acrylic mirrors behind the shapes.
- There is a clear panel which can be decorated with wipe off pens and paints. Use this for artwork, mark making or creating a mini scene.
- Rather than just dividing an area these screens can be decorated by the children and provide them with a sense of ownership.
