

## Outdoor Weaving Panel - EY05233

This panel may be used indoors or out. It can be set up as an individual resource or as part of a set including mark making surfaces. (See the full range of panels).

There are lots of suggestions as to how the panel may be decorated. Here are just a few:

- Try adding ribbons of different lengths, patterns etc. This is great for joining techniques.
- Thread beads, bobbins, giant sequins etc.
- Try using natural materials such as leaves and grasses.
- Tie messages on to different shaped papers. Use luggage labels or give the children access to hole punches, enabling them to be able to thread the card or paper.
- Write messages for different audiences e.g. the fairies. Shrink the letters on the photocopier machine so that they are tiny.
- Write wishes, hopes etc. and attach them.
- Thread shredded materials e.g fabrics. Try making strips of ribbon from plastic carrier bags.
- Pipe cleaners are easily attached to the mesh. Sparkly versions look great.
- Try to tie a bow on the mesh. This is good practice for tying shoe laces.

Create pictures on the mesh. Attach cut outs of boats and then make waves with blue ribbon. Then thread small fish etc. for a seaside theme.
