

Water Play Tunnel Stand

Product Code: EY10062

- This is a great opportunity for the children to experiment and explore. Place the stand in a tray and then using a wide variety of receptacles to fill the tubes. Watch as the water spurts out and try and collect it. The children can select funnels (not included) to place on the top of the tubes or simply pour the water directly into them. Try using pans, watering cans, metal and plastic mugs, ladles etc. You could try using a piece of tubing to fill one of the stands.
