FU00896 Pack of 3 Huts

44kg

Warnings

These products are hand-made from natural materials and therefore may contain some sharp edges and small tacks or staples which are necessary to secure the willow in place at the start of weaving. The approx weight and dimensions of the individual products listed and 2 person handling is recommended on the medium, large and 3 pack items. The natural material used to make willow products means that the colour may change as it is exposed to the elements.

Care

Please check the product carefully before use and periodically remove any sharp edges with clippers. Small tacks or staples used in construction may also become loose as the product moves and should be removed or readjusted as necessary. Willow becomes brittle when it's dried out so please hose down during dry periods (even winter) to keep supple and strong.

Fixing

These items are designed for outdoor use and should be placed on a soft level surface. For a more secure fixture base positioning points should be dug into ground. Add postcrete for a more permanent fixing.
