

Lightbox Acrylic

Product Notes

www.tts-shopping.com

This is just one of the many resources you can use with your light panel. Children will love connecting the pieces together. Feedback when testing the resource was that this was a really relaxing and therapeutic activity. The light panel adds extra engagement as the pieces glow.

- You could try just placing and connecting the pieces together. This will also promote hand-eye co-ordination skills as well as fine motor skills. The children also need to apply their spatial awareness skills.
- The pieces could be sorted by colour. Try them to make patterns and sequences.
- Try connecting the jigsaw pieces vertically. How many can you stack?
