

Make Every Moment Count!®

Time Timer® believes in creating products that truly help people of all ages and abilities conquer time.

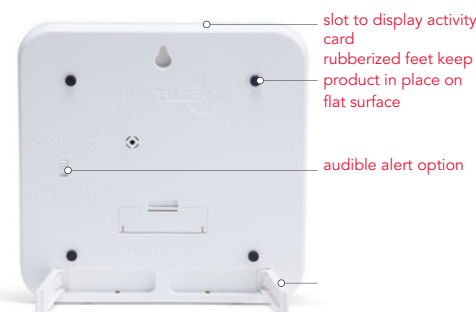

Time Timer® BRAILLE Medium

A high contrast countdown timer for low vision

Since the beginning, Time Timer® has been utilized by users with low vision. We took a step back, and asked ourselves, how can we further assist our users with low vision or blindness? The Time Timer® BRAILLE Medium timer was conceived. Available with either a red disk or black disk - the high contrast disk and braille numbers, along with the open-face design allows for a tactile experience to aid in setting the timer while also encouraging Braille education. Can be displayed on a flat surface with rubberized feet to keep in place, or upright with foldable feet. The high contrast disk aids low vision users to discern the time remaining. Audible final alert optional. Retail package also features braille descriptions.

Timer requires 1 AA/1.5V battery, not included.

Benefits:

- High Contrast Disk
- Distraction Free, Open Face
- Embossed Braille Numbers
- No Loud Ticking
- Tactile Set Bar
- 1 Year Premium App Access
