

# Changing Channels Set

---

## Product Code

EY04726

## Ideas

- The children can use different containers to pass the water along the pathways. Hang a selection of pans on the fences for them to select.
- Try using an assortment of buckets and bowls. It is important for children to play with different materials so try to have metal and wood as well as plastic.
- Try to incorporate different sized watering cans, with and without the rose connection. Funnels, sieves, big spoons and ladles may also be useful to experiment with.
- Fill old washing up bottles or big spray containers full of water to get the water into the channels.
